Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 288, Nos. 1 & 2, August 2006

J. Yang, J. Yao, L. Chen and J. Yang: The Amino-terminal domain of tntegrin β3 functions as a transcriptional activator in yeast 1–5

M. Raju, R. Lakshminarayana, T.P. Krishnakantha and V. Baskaran: Micellar oleic and eicosapentaenoic acid but not linoleic acid influences the β-carotene uptake and its cleavage into retinol in rats 7–15

J.M. Yu, J.H. Kim, G.S. Song and J.S. Jung: Increase in proliferation and differentiation of neural progenitor cells isolated from postnatal and adult mice brain by Wnt-3a and Wnt-5a 17–28

M.M. Staniszewska and R.H. Nagaraj: Upregulation of glyoxalase I fails to normalize methylglyoxal levels: A possible mechanism for biochemical changes in diabetic mouse lenses 29–36

P. Chaudhary, S.K. Shukla, I.P. Kumar, I. Namita, F. Afrin and R.K. Sharma: Radioprotective properties of apple polyphenols: An *in vitro* study 37–46

S. Mori, S. Ozaki, T. Yasugi, H. Yoshikawa, Y. Taketani and T. Kanda: Inhibitory cis-element-mediated decay of human papillomavirus type 16 L1-transcript in undifferentiated cells 47–57

S. Ghelardoni, S. Frascarelli, V. Carnicelli, S. Ronca-Testoni and R. Zucchi: Modulation of cardiac sarcoplasmic reticulum calcium release by aenosine: A protein kinase C- dependent pathway 59–64

K. Liu, X. Bai, J. Yu, J. Li, Q. Wei, G. Han, G. Li and Y. Cui: The phosphoenolpyruvate carboxykinase of *Mycobacterium tuberculosis* induces strong cell-mediated immune responses in mice 65–71

S. Sundravel, P. Shanthi and P. Sachdanandam: Therapeutic potential of riboflavin, niacin and ascorbic acid on carbohydrate metabolizing enzymes in secondary endometrial carcinoma bearing rats 73–78

J. Knez, D. Piluso, P. Bilan and J.P. Capone: Host cell factor-1 and E2F4 interact via multiple determinants in each protein 79–90

J.H. Noh, S.Y. Ryu, J.W. Eun, J. Song, Y.M. Ahn, S.Y. Kim, S.H. Lee, W.S. Park, N.J. Yoo, J.Y. Lee, S.N. Lee and S.W. Nam: Identification of large-scale molecular changes of Autotaxin(*ENPP2*) knock-down by small interfering RNA in breast cancer cells 91–106

A. Arunkumar, M.R. Vijayababu, N. Srinivasan, M.M. Aruldhas and J. Arunakaran: Garlic compound, diallyl disulfide induces cell cycle arrest in prostate cancer cell line PC-3 107–113

A.J. Vanisree and N. Sudha: Curcumin combats against cigarette smoke and ethanol-induced lipid alterations in rat lung and liver 115–123

S. Rajan, C. Horn and E.C. Abraham: Effect of oxidation of αA- and αB-crystallins on their structure, oligomerization and chaperone function 125–134

Y. Du and K.M. Ko: Effects of pharmacological preconditioning by emodin/oleanolic acid treatment and/or ischemic preconditioning on mitochondrial antioxidant components as well as the susceptibility to ischemia-reperfusion injury in rat hearts 135–142

L. Kma and R.N. Sharan: *In vivo* exposure of Swiss albino mice to chronic low dose of dimethylnitrosamine (DMN) lowers poly-ADP-ribosylation (PAR) of bone marrow cell and blood lymphocyte proteins 143–149

J. Li, J. Wang, X. Yang, J. Li, H. Qin, X. Dong, Y. Zhu, L. Liang, Y. Liang and H. Han: The Spen homolog Msx2-interacting nuclear target protein interacts with the E2 ubiquitin-conjugating enzyme UbcH8 151–157

R. Pawlowski and J. Jura: ALR and liver regeneration 159–169

U. Tran, T. Boyle, J.W. Shupp, R. Hammamieh and M. Jett: Staphylococcal enterotoxin B initiates protein kinase C translocation and eicosanoid metabolism while inhibiting thrombin-induced aggregation in human platelets 171–178

L. Zhang, D.B. Badgwell, J.J. Bevers III, K. Schlessinger, P.J. Murray, D.E. Levy and S.S. Watowich: IL-6 signaling via the STAT3/SOCS3 pathway: Functional analysis of the conserved STAT3 N-domain 179–189

L.M. Torres, C. Cefaratti, B. Perry and A. Romani: Involvement of ERK1/2 and p38 in Mg^{2+} accumulation in liver cells 191–199

A. Chabowski, I. Momken, S.L.M. Coort, J. Calles-Escandon, N.N. Tandon, J.F.C. Glatz, J.J.F.P. Luiken and A. Bonen: Prolonged AMPK activation increases the expression of fatty acid transporters in cardiac myocytes and perfused hearts 201–212

A.M. Komarov, J.M. Hall, J.J. Chmielinska and W.B. Weglicki: Iron uptake and release by macrophages is sensitive to propranolol 213–217
